Notes on Ordering:

Thank you for all your orders in 2025. It is that time again! We are now taking pre-orders for the 2026 Growing Season. To meet demand for the Ceanothus and Arctostaphylos, please place your pre-order by mid December.

We follow the plant's cues on when it is time to propagate, so plants ship as ready from winter 2025 to fall 2026. Please inquire with us if you have specific production requirements or do not see what you need listed here. The container size shown is the smallest grown for each species - larger sizes available upon request.

A minimum order of \$1000.00 in plant material is required to place a pre-order. Liners and Treebands must be ordered in full flat quantities of 50 per species, L3 size come in flats of 36. We prefer that you fill out the Excel form and email back to us. If a non-Excel user you can fax or mail back.

We are looking forward to the next growing season 2026!

Codes: G-Grass, P-Perennial, S-Shrub, T-Tree, V-Vines, SUC-Succulents, W-Wetland species
